

Vibration testing

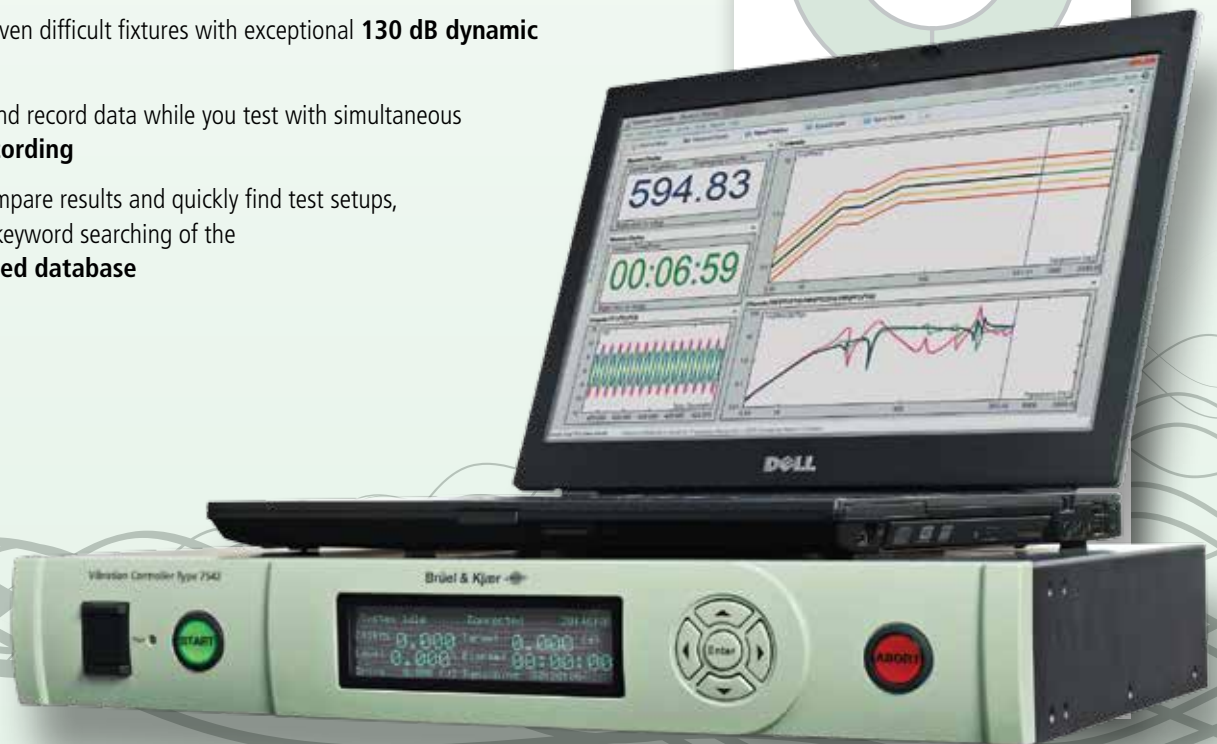

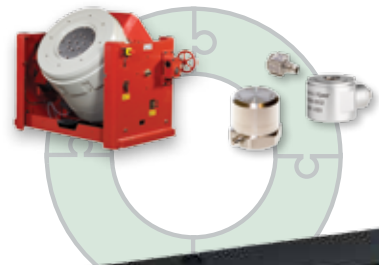

Next generation shaker control

Bring the future to your vibration testing with the new VC-LAN Vibration Controller from Brüel & Kjær

- Place the controller near the shaker, and monitor from a remote PC via **LAN connection**
- Get it right the first time with **stand-alone operation** using simple push-buttons, and without an attached PC
- Safeguard your shaker system and critical test data with the built-in **power-loss protector**, which ensures smooth shaker shutdown and saves data if power is lost
- Control even difficult fixtures with exceptional **130 dB dynamic range**
- Stream and record data while you test with simultaneous **data recording**
- Easily compare results and quickly find test setups, through keyword searching of the **embedded database**

ALL FROM ONE PARTNER

Brüel & Kjær has the world's most comprehensive range of sound and vibration test and measurement systems
