

MAKE THE RIGHT MEASUREMENTS AND DRAW THE RIGHT CONCLUSIONS QUICKER AND EASIER THAN EVER BEFORE

MEASUREMENT PARTNER

MEASUREMENT PARTNER COMPONENTS

Type 2250/Type 2270 HandHeld Analyzer

The world's favourite hand-held analyzer is now available with wireless communication to transfer data seamlessly to the cloud. This cuts out cables and memory cards and makes your life easier. It also enables remote control and added features from applications on smartphones and tablets.

Already got a Type 2250? Simply buy our Wi-Fi dongle¹ and start your superior measurement experience.

Measurement Partner Field App

The field app is a smartphone companion app for your hand-held analyzer that provides a superior measurement experience.

The field app helps you collect measurement metadata including location, site photographs, written notes and even voice memos. It connects wirelessly to your hand-held analyzer to provide simple remote control so you can step out of the sound field.

Annotations are merged with the measurement data in Measurement Partner Cloud and are available during post-processing and reporting.

Measurement Partner Cloud

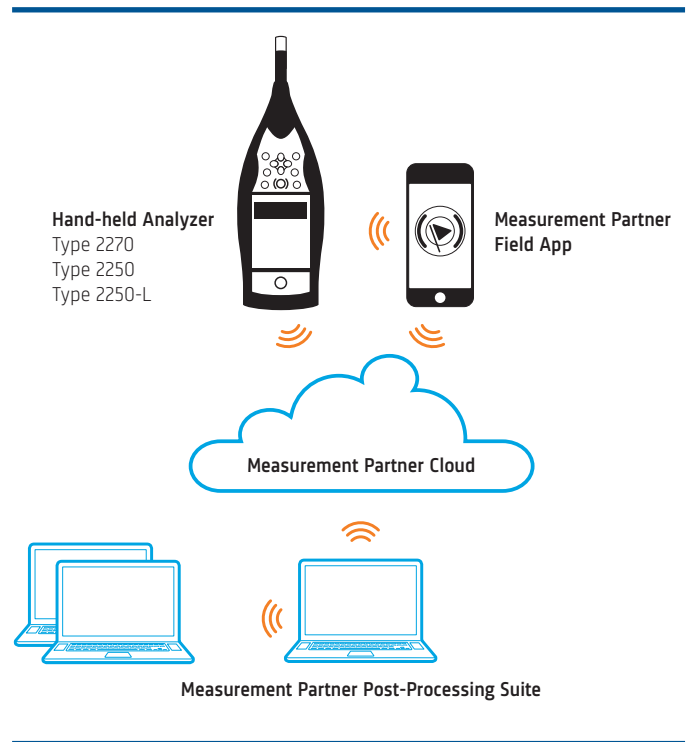

With your data stored securely in the cloud you can access it from anywhere, anytime. No more lost data files or inability to work because the data is stuck on your PC back in the office. Measurement Partner Cloud works seamlessly with the field app and Measurement Partner Suite to speed you through measurement analysis.

You can share the files instantly with anyone else. They just need an internet connection, a copy of Measurement Partner Suite and your permission.

Measurement Partner Suite

We've updated the post-processing software to give you access to your measurement archives in the cloud. You can view them alongside your local files, and share them with others.

Now you can check your measurements before you leave the site and do your analysis in the field, at the office or at home.

Measurement Partner Learning Centre

The Type 2250/Type 2270 family of instruments are extremely flexible and powerful. The learning centre gives you access to manuals, guidelines, videos and training courses to help you get the most out of your equipment.

Measurement Partner Community

The online community connects thousands of Type 2250/ Type 2270 users from around the world. Here you can share your experiences, seek assistance and help others. Our Measurement Partner blogs will keep you informed and up to speed with what's happening in the field of hand-held sound and vibration measurement.
