

PHOTON+ PULSE REFLEX

SPECIAL OFFER

Special discounts on basic and advanced PULSE Reflex™ with Photon+™

PHOTON+ is an ultra-portable USB powered Real-time Analyzer for Noise and Vibration Analysis. It includes a full range of easy-to-use software applications available for noise and vibration, FFT analysis, order tracking and rotating machinery analysis and automated production line testing. Time recordings from PHOTON+ can currently be exported as BKC, UFF (.uff and .buff) and WAV. Spectra data (Auto, Cross, FRF) can currently be exported as UFF (.uff and .buff).

- 50% discount on all PULSE Reflex reporting items (Types 8700, 8701)*
- 50% discount on all Basic PULSE Reflex Core items (Types 8700, 8702)*
- 33% discount on all Advanced Reflex Core items (Types 8703, 8704, 8705, 8706, 8710) and Reflex Structural Analysis (Types 8719, 8720, 8721, 8722)*

* These discounts are offered when purchased new, or for existing customers together with the full PHOTON+ kit: Type 986A0186 PHOTON+ with RT Pro Software, and will require the customer to sign up for full-value M1 contracts for minimum 1 year.

For further information on these offers, contact your local Brüel & Kjær representative.

This offer is valid from now until December 31, 2016. Not valid with any other offer.
