

BRÜEL & KJÆR ANNUAL SOFTWARE LICENSING PACKS

FIVE DOMAIN-SPECIFIC S&V MEASUREMENT AND ANALYSIS PACKS

If you're a single user running the show in a small S&V test department or a domain expert working independently among other domain experts, your job probably won't focus on repeating the same test over and over. In fact, there could be a variety of tests you need to perform to complete your reports; the types of test you need to acquire the right data may change; or over the course of a project, you may need several different capabilities to get the data you need to pinpoint problems. If so, buying individual licenses, just in case you might need them, can be cost prohibitive.

DOMAIN-SPECIFIC LICENSE PACKS

Our application Software license Packs leases are a great way to provide access to a wide variety of measurement and analysis capabilities for the flexibility you need for to your jobs to do.

These five domain-specific packs are comprised of a selection of tools that cover a wide range of options within a given field of measurement and analysis:

1. Data Recording and Acquisition
2. Structural Analysis
3. Array Acoustics
4. Acoustic Applications
5. Source Path Contribution

SERVICE AND MAINTENANCE INCLUDED

Each pack is contained in a single license that comes with a maintenance agreement that keeps your software up to date and includes access to our knowledgeable support team. This means that, for a set price, you gain single-user access, to a wide range of software options within a given application area, the latest updates for that software and support for any issues that may arise.
