LDS-Dactron Shaker Control Version 8.00.9270

October 1, 2009

Enhancements and Bug Fixes

Kurtosis Parameter Control added to Premier Random
The Kurtosis Parameter Control option for Premier Random Vibration Control software adds the capability to do vibration testing using a non-Gaussian excitation signal. The kurtosis parameter, "K", is set by the user to simulate a wide range of non-Gaussian signals that are seen in field measurements.
